**RISKS:** In addition to the general stock market risk that securities may fluctuate in value, investments in developing countries may have increased risks due to a greater possibility of settlement delays; currency and capital controls; interest rate sensitivity; corruption and crime; exchange rate volatility; and inflation or deflation.

**MSCI Emerging Markets Index** is an unmanaged float-adjusted market capitalization index designed to measure equity market performance of large and mid cap securities in the emerging markets. The **MSCI World Index** is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country and MSCI World Index does not offer exposure to emerging markets. **S&P 500 Index** measures the performance of 500 widely held large-cap U.S. companies. The index performance is not fund performance; one cannot invest directly into an index.
