

**DEAR BARON WEALTHBUILDER FUND SHAREHOLDER:**

**PERFORMANCE**

Baron WealthBuilder Fund (the "Fund") increased in value 5.85% (Institutional Shares) in the three-month period ended June 30, 2019. The S&P 500 Index (the "S&P 500") appreciated 4.30%. The MSCI ACWI Index (the "MSCI ACWI") gained 3.61%. These strong absolute and relative results are a continuation of the Fund's outperformance in the prior quarter. The Fund has now increased 25.78% in the first half of calendar year 2019. That compares to the S&P 500 and MSCI ACWI which have gained 18.54% and 16.23%, respectively.

The second quarter of the year was volatile as market sentiment swung from bullish to bearish and back to bullish. After signs of slower global economic activity, the period ended on a strong note as tensions with major trading partners in China and Mexico eased; the Federal Reserve's posture became dovish, and other central banks began to implement stimulative monetary policies.

Our "Disruptive" and "Core Growth" companies continued to perform well. Businesses with legacy business models and which are unable or unwilling to alter their practices faltered, while more nimble, innovative growth competitors took market share. The S&P 500 and broader world indexes are plagued by the former. Avoiding such businesses proved beneficial to the performance of the underlying diversified Baron Funds' portfolios in which Baron WealthBuilder Fund invests.

Baron's domestic, mid-cap growth funds did exceptionally well in the period. This was as quality, consistent growth companies were heavily rewarded. Some smaller-sized businesses were penalized as concerns regarding a cyclical slowdown increased. Small-cap health care stocks held by

underlying Baron mutual funds were negatively impacted by political rhetoric. Investors became concerned such businesses would be forced to accept lower rates if our government assumed more payment responsibilities.

Baron WealthBuilder Fund's exposure to emerging markets was the only allocation that detracted from our relatively strong performance in the quarter.

We believe Baron's fundamental investment analyses and well-established process should result in the Baron funds in which Baron Wealth Builder Fund invests continuing to outperform their various benchmarks over the long term. Our repeatable formula of discovering, researching and investing for the long term in businesses with sizable opportunities, and durable competitive advantages led by talented executives is well established. We try to purchase at attractive prices and remain owners for the long term. This is to benefit from the success of these businesses over extended time periods. We do not try to benefit from short-term fluctuations in the markets and economy. It is a strategy that has proven successful. 87.8% of Baron WealthBuilder Fund assets are invested in underlying Baron Funds that exceeded their respective benchmark indexes in the most recent period.

*Performance listed in the above table is net of annual operating expenses. Annual expense ratio for the Retail Shares, Institutional Shares and TA Shares as of December 31, 2018 was 2.02%, 1.61% and 1.71%, respectively, but the net annual expense ratio was 1.42%, 1.17% and 1.17% (includes acquired fund fees, net of the Adviser's fee waivers), respectively. The performance data quoted represents past performance. Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate; an investor's shares, when redeemed, may be worth more or less than their original cost. BAMCO, Inc. ("BAMCO" or the "Adviser") has agreed that, pursuant to a contract expiring on August 29, 2030, unless renewed for another 11-year term, it will reimburse certain expenses of the Fund, limiting net annual operating expenses (portfolio transaction costs, interest, dividend, acquired fund fees and expenses and extraordinary expenses are not subject to the operating expense limitation) to 0.30% of average daily net assets of Retail Shares, 0.05% of average daily net assets of Institutional Shares and 0.05% of average daily net assets of TA Shares, without which performance would have been lower. Current performance may be lower or higher than the performance data quoted. For performance information current to the most recent month end, visit [www.BaronFunds.com](http://www.BaronFunds.com) or call 1-800-99BARON.*

<sup>1</sup> The indexes are unmanaged. The index performance is not Fund performance; one cannot invest directly into an index. The S&P 500 Index measures the performance of 500 widely held large cap U.S. companies. The MSCI ACWI Index is an unmanaged, free float-adjusted market capitalization weighted index reflected in US dollars that measures the equity market performance of large- and mid-cap securities across developed and emerging markets. The indexes and the Fund are with dividends, which positively impact the performance results.

<sup>2</sup> The performance data in the table does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.

# Baron WealthBuilder Fund

91.5% of assets are invested in Baron funds that have exceeded their benchmarks since Baron WealthBuilder Fund's inception, or since initial purchase.

We encourage you to read the various quarterly letters found in this report for a deeper understanding of the funds that comprise Baron WealthBuilder Fund.

## FUND OF FUNDS STRUCTURE AND INVESTMENT STRATEGY

Baron WealthBuilder Fund enables investors to diversify across the **98.8%** of Baron Funds' assets under management ("AUM") that have outperformed their benchmarks from inception. Such investments provide exposure to Baron portfolios with various market caps, sectors, and geographies in a single structure. Further, each Baron Fund employs the same core investment process and philosophy. Our unique investment approach and process has yielded outstanding results since the firm's founding in 1982. 14 of 16 Baron mutual funds, representing **98.8%** of Baron Funds' AUM, have outperformed their respective passive benchmarks since the inceptions of those funds. 10 of those funds, representing **97.8%** of Baron Funds' AUM, rank in the **top 17%** of their respective Morningstar categories and 6, representing **61.5%** of Baron Funds' AUM, rank in the **top 6%**.

The makeup of the underlying investment portfolios is significantly different than the indexes. Consequently, the Fund has a high "active share" when measured against benchmarks. We feel the diversity in regions and sectors of the Fund's underlying growth portfolios dampen risk while providing strong absolute returns. While nearly matching the number of holdings in the S&P 500 (464 stocks in Baron WealthBuilder versus 502 in the S&P 500), the similarities end there. The holdings in the Fund have a lower dividend yield (0.7% versus 2.0% for the S&P 500), with companies most often electing instead to reinvest earnings in their businesses for growth. The approach is working. The projected earnings per share growth rate over

the next 3-to-5 years is 16.2% for companies in the underlying Baron portfolios versus 11.6% for the S&P 500 (39.7% higher growth). Further, we feel many of our investments can exceed those goals. These businesses more than doubled the S&P 500's growth rate over the proceeding five years. The Fund's five-year historical earnings per share growth rate is 16.3% versus the S&P 500's 7.9%. Yet these companies are only 47.7% more expensive than the S&P 500's holdings (*the Fund's trailing price to earnings ratio is 29.4 versus 19.9 for the S&P 500*). We feel that this valuation metric is misleading since many holdings have depressed margins as they sacrifice current profitability for higher long-term growth rates and sustainability. Significantly higher growth for a moderate price premium has historically been rewarded. We believe significantly higher growth for a moderate price premium will be rewarded.

Baron WealthBuilder Fund's portfolio is also distinct in its sector weightings. The S&P 500 has a higher share of Consumer Staples, Energy, and Utilities businesses. Those are typically defensive companies that have limited unique traits and slower growth prospects and are often reliant on unpredictable commodity prices. Baron WealthBuilder Fund instead favors Consumer Discretionary, Information Technology, Industrials, and Real Estate firms where competitive advantage is more apparent and growth projections more robust.

Finally, the Fund is exposed to international companies. The S&P 500 includes only domestic businesses. The MSCI ACWI has global coverage. North America is 58.1% of that index compared to 85.8% for the Fund. But the greater international exposure for the MSCI ACWI Index is heavily skewed towards slowly growing developed markets. Baron WealthBuilder Fund seeks faster growth in emerging economies. 39.5% of the Fund's international investments are in Asia/ Pacific ex Japan, versus 29.4% for the MSCI ACWI. The MSCI ACWI has 63.8% of its international investments in slower growth European and Japanese companies while this region constitutes 31.7% of the Fund's international investments.

*Investors should consider the investment objectives, risks, and charges and expenses of the investment carefully before investing. The prospectus and summary prospectus contain this and other information about the Funds. You may obtain them from its distributor, Baron Capital, Inc., by calling 1-800-99BARON or visiting [www.BaronFunds.com](http://www.BaronFunds.com). Please read them carefully before investing.*

**Risks:** The Fund is a non-diversified fund because it invests, at any given time, in the securities of a select number of Baron mutual funds (the "Underlying Funds"), representing specific investment strategies. The Fund can invest in funds holding U.S. and international stocks; small-cap, small to mid-cap, large-cap, all-cap stocks; and specialty stocks. Each of the Underlying Funds has its own investment risks, and those risks can affect the value of the Fund's investments and therefore the value of the Fund's shares. To the extent that the Fund invests more of its assets in one Underlying Fund than in another, it will have greater exposure to the risks of that Underlying Fund. For further information regarding the investment risks of the Underlying Funds, please refer to the Underlying Funds' prospectus.

The Fund may not achieve its objectives. Portfolio holdings are subject to change. Current and future portfolio holdings are subject to risk.

**Active Share:** a term used to describe the share of a portfolio's holdings that differ from that portfolio's benchmark index. It is calculated by comparing the weight of each holding in the Fund to that holding's weight in the benchmark. Positions with either a positive or negative weighting versus the benchmark have Active Share. An Active Share of 100% implies zero overlap with the benchmark. Active Share was introduced in 2006 in a study by Yale academics, M. Cremers and A. Petajisto, as a measure of active portfolio management.
