Baron Discovery Fund

Supplement dated August 20, 2020
to Summary Prospectus dated January 28, 2020

IMPORTANT NOTICE REGARDING CHANGE IN THE INVESTMENT STRATEGY

Effective Monday, October 19, 2020, in connection with the principal investment strategy of Baron Discovery Fund (the "Fund"), the Summary Prospectus of the Fund is modified as follows:

On page 2 of the Summary Prospectus, the following sentence under "Principal Investment Strategies of the Fund," which reads as follows: "The Fund is a diversified fund that invests primarily in equity securities in the form of common stock of U.S. small-sized growth companies. The Adviser defines small-sized companies as those, at the time of purchase, with market capitalizations up to the largest market cap stock in the Russell 2000 Growth Index at June 30, or companies with market capitalizations up to \$2.5 billion, whichever is larger, so long as the purchase of those securities would not cause the Fund's weighted average market capitalization to exceed that of the Russell 2000 Growth Index. If at any time, the Fund's weighted average market capitalization exceeds that of the Russell 2000 Growth Index, the Fund may only purchase securities with market capitalizations up to the weighted average market capitalization of the Russell 2000 Growth Index. The Adviser seeks to invest in businesses it believes have significant opportunities for growth, sustainable competitive advantages, exceptional management, and an attractive valuation." is deleted in its entirety and replaced with the following: **"The Fund is a diversified fund that invests for the long term primarily in equity securities in the form of common stock of U.S. small-sized growth companies. The Adviser defines small-sized companies as those, at the time of purchase, with market capitalizations up to the largest market cap stock in the Russell 2000 Growth Index at reconstitution, or companies with market capitalizations up to \$2.5 billion, whichever is larger. The Adviser seeks to invest in businesses it believes have significant opportunities for growth, sustainable competitive advantages, exceptional management, and an attractive valuation."**

Baron Discovery Fund

Investment Goal

The investment goal of Baron Discovery Fund (the "Fund") is capital appreciation through investments primarily in securities of small-sized growth companies.

Fees and Expenses of the Fund

The table below describes the fees and expenses that you would pay if you bought and held shares of the Fund.

Annual Fund Operating Expenses

(Expenses that you pay each year as a percentage of the value of your investment)

	Management Fee	Distribution (12b-1) Fee	Other Expenses	Total Annual Fund Operating Expenses	Expense Reimbursements	Total Annual Fund Operating Expenses after Expense Reimbursements ¹
BARON DISCOVERY FUND						
Retail Shares	1.00%	0.25%	0.11%	1.36%	(0.01)%	1.35%
Institutional Shares	1.00%	0.00%	0.10%	1.10%	—	1.10%
R6 Shares	1.00%	0.00%	0.09%	1.09%	—	1.09%

¹ BAMCO, Inc. ("BAMCO" or the "Adviser") has agreed that, pursuant to a contract with an 11-year term terminating on August 29, 2030, it will reimburse certain expenses of the Fund, limiting net annual operating expenses (portfolio transaction costs, interest, dividend and extraordinary expenses are not subject to the operating expense limitation) to 1.35% of average daily net assets of Retail Shares, 1.10% of average daily net assets of Institutional Shares, and 1.09% of average daily net assets of R6 Shares. Only the Board of Trustees of the Fund may terminate the expense reimbursement agreement prior to its termination date.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each

Baron Discovery Fund

year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

YEAR	1	3	5	10
BARON DISCOVERY FUND				
Retail Shares	\$137	\$428	\$739	\$1,624
Institutional Shares	\$112	\$350	\$606	\$1,340
R6 Shares	\$111	\$347	\$601	\$1,329

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes for Fund shareholders. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, affect the Fund's performance. During the most recent fiscal year ended September 30, 2019, the Fund's portfolio turnover rate was 55.94% of the average value of its portfolio.

Investments, Risks, and Performance

Principal Investment Strategies of the Fund

The Fund is a diversified fund that invests primarily in equity securities in the form of common stock of U.S. small-sized growth companies. The Adviser defines small-sized companies as those, at the time of purchase, with market capitalizations up to the largest market cap stock in the Russell 2000 Growth Index at June 30, or companies with market capitalizations up to \$2.5 billion, whichever is larger, so long as the purchase of those securities would not cause the Fund's weighted average market capitalization to exceed that of the Russell 2000 Growth Index. If at any time, the Fund's weighted average market capitalization exceeds that of the Russell 2000 Growth Index, the Fund may only purchase securities with market capitalizations up to the weighted average market capitalization of the Russell 2000 Growth Index. The Adviser seeks to invest in businesses it believes have significant opportunities for growth, sustainable competitive advantages, exceptional management, and an attractive valuation.

Principal Risks of Investing in the Fund

General Stock Market. Investing in the stock market is risky because securities fluctuate in value. These fluctuations may be due to political, economic or general market circumstances. Other factors may affect a single company or industry but not the broader market. Because the values of securities fluctuate, when you sell your investment in the Fund, you may lose money. Current and future portfolio holdings in the Fund are subject to risk.

Growth Investing. Growth stocks can react differently to issuer, political, market and economic developments than the market as a whole and other types of stocks. Growth stocks tend to be more expensive relative to their earnings or assets compared to other types of stocks. As a result, growth stocks tend to be sensitive to changes in their earnings and more volatile than other types of stocks.

Small-Sized Companies. The Adviser believes there is more potential for capital appreciation in small-sized companies, but there also may be more risk. Securities of small-sized companies may not be well known to most investors, and the securities may be less actively traded than those of large businesses. The securities of small-sized companies may fluctuate in price more widely than the stock market generally, and they may be more difficult to sell during market downturns. Small-sized companies rely more on the skills of management and on their continued tenure. Investing in small-sized companies requires a long-term outlook and may require shareholders to assume more risk and to have more patience than investing in the securities of larger, more established companies.

Special Situations. The Funds may invest in “special situations.” A special situation arises when, in the opinion of the Adviser, the securities of a company will be recognized and appreciate in value due to a specific anticipated development at that company. Such developments might include a new product, a management change, an acquisition or a technological advancement. The risk of investing in special situations is that the anticipated development does not occur or its impact is not what the Adviser expected.

Health Care Sector Risk. Investments in health care companies are subject to a number of risks, including the adverse impact of legislative actions and government regulations. These actions and regulations can affect the approval process for patents, medical devices and drugs, the funding of research and medical care programs, and the operation and licensing of facilities and personnel. Biotechnology and related companies are affected by patent considerations, intense competition, rapid technology change and obsolescence, and regulatory requirements of various federal and state agencies. In addition, some of these companies are relatively small and have thinly traded securities, may not yet offer products or may offer a single product, and may have persistent losses during a new product’s transition from development to production, or erratic revenue patterns. The stock prices of these companies are very volatile, particularly when their products are up for regulatory approval and/or under regulatory scrutiny.

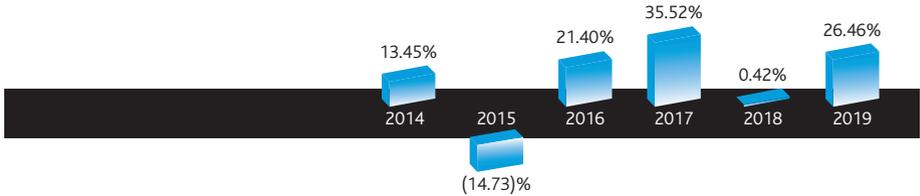

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund (Retail Shares) by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns for 1 and 5 years and since inception compare with those of a broad measure of market performance. The

Baron Discovery Fund

Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available online at www.BaronFunds.com/performance or by calling 1-800-99BARON (1-800-992-2766).

Year by Year Total Return (%) as of December 31 of Each Year (Retail Shares)

Best Quarter: 03/31/19: 19.60%

Worst Quarter: 12/31/18: (23.39)%

Average Annual Total Returns (for periods ended 12/31/19)

The following table shows the Fund's Retail Shares' annual returns and long-term performance (before and after taxes) and the change in value of broad-based market indexes over various periods ended December 31, 2019. The table also shows the average annual returns of the Fund's Institutional Shares and R6 Shares, but it does not show after-tax returns.

After-tax returns are calculated using the highest individual federal marginal income tax rate in effect at the time of each distribution and assumed sale, but they do not include the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns reflect past tax effects and are not predictive of future tax effects. After-tax returns are not relevant to investors who hold their Fund's shares in a tax-deferred account (including a 401(k) or IRA or Coverdell account), or to investors that are tax-exempt.

Tax Information

Distributions of the Fund's net investment income (other than "qualified dividend income") and distributions of net short-term capital gains will be taxable to you as ordinary income. Distributions of the Fund's net capital gains reported as capital gain dividends by the Fund will be taxable to you as long-term capital gains, regardless of the length of time you have held shares of the Fund. If you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, you may be subject to federal income tax on withdrawals from tax-deferred arrangement at a later date.

Financial Intermediary Compensation

If you purchase Retail or Institutional Shares of the Fund through a broker, dealer or other financial intermediary (such as a bank or financial adviser), the Fund, Baron Capital, Inc., the Fund's distributor, BAMCO or their affiliates may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker, dealer or other financial intermediary, including your salesperson, to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
