

# Are EM Equities Poised to Outperform?

August 31, 2021

EM Equities Have Lagged U.S. Equities in Recent Years

**We believe now may be an ideal time to invest in emerging markets equities**

- Relative performance of EM equities vs. U.S. equities has historically been cyclical
- EM equities have lagged U.S. equities over the last few years
- The performance cycle may be due for a reversal in favor of EM equities

Ratio of MSCI EM Index to S&P 500 Index

**Price/Earnings Ratio (trailing 12-months):** is a valuation ratio of a company's current share price compared to its actual earnings per share over the last twelve months. If a company's actual EPS is negative, it is excluded from the portfolio-level calculation.

The **MSCI Emerging Markets Index** is an unmanaged float-adjusted market capitalization index designed to measure equity market performance of large and mid cap securities in the emerging markets. The **MSCI World Index** is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country and **MSCI World Index** does not offer exposure to emerging markets. The **S&P 500 Index** measures the performance of 500 widely held large-cap U.S. companies. MSCI is the source and owner of the trademarks, service marks and copyrights related to the MSCI Indexes. The indexes are unmanaged. The index performance is not fund performance; one cannot invest directly into an index.
