The performance data quoted represents past performance. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance data quoted.

Risks: Non-U.S. investments may involve additional risks to those inherent in U.S. investments, including exchange-rate fluctuations, political or economic instability, the imposition of exchange controls, expropriation, limited disclosure and illiquid markets. This may result in greater share price volatility. Investments in developing countries may have increased risks due to a greater possibility of: settlement delays; currency and capital controls; interest rate sensitivity; corruption and crime; exchange rate volatility; and inflation or deflation.

MSCI ACWI ex USA Index measures the equity market performance of large- and mid-cap securities across developed and emerging markets, excluding the U.S. S&P 500 Index measures the performance of 500 widely held large-cap U.S. companies. The index performance is not fund performance; one cannot invest directly into an index.
