NOTES TO PORTFOLIOS OF INVESTMENTS (UNAUDITED)

1. ORGANIZATION

Baron Investment Funds Trust (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company established as a Massachusetts business trust on February 19, 1987. The Trust currently offers seven series (individually, a Fund and collectively, the Funds): Baron Asset Fund, Baron Growth Fund, Baron Small Cap Fund, Baron Opportunity Fund, Baron Fifth Avenue Growth Fund, Baron Discovery Fund, and Baron Durable Advantage Fund.

Each Fund offers Retail Shares, Institutional Shares, and R6 Shares. Each class of shares differs only in its ongoing fees, expenses, and eligibility requirements. Each class of shares has equal rights to earnings and assets, except that each class bears different expenses for distribution and shareholder servicing. Each Fund's investment income, realized and unrealized gains or losses on investments and foreign currency, and expenses other than those attributable to a specific class are allocated to each class based on its relative net assets. Each class of shares has exclusive voting rights with respect to matters that affect just that class.

Each Fund is diversified. The investment goals of the Funds are as follows:

Baron Asset Fund seeks capital appreciation through long-term investments primarily in securities of medium-sized companies with undervalued assets or favorable growth prospects.

Baron Growth Fund seeks capital appreciation through long-term investments primarily in securities of small-sized growth companies.

Baron Small Cap Fund seeks capital appreciation through investments primarily in securities of small-sized growth companies.

Baron Opportunity Fund seeks capital appreciation through investments primarily in growth companies that benefit from technology advances.

Baron Fifth Avenue Growth Fund seeks capital appreciation through investments primarily in securities of large-sized growth companies.

Baron Discovery Fund seeks capital appreciation through investments primarily in securities of small-sized growth companies.

Baron Durable Advantage Fund seeks capital appreciation through long-term investments primarily in securities of large-sized companies.

2. SIGNIFICANT ACCOUNTING POLICIES AND INVESTMENT RISKS

The following is a summary of significant accounting policies followed by the Funds. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The Trust is an investment company and therefore follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 Financial Services — Investment Companies.

a) Net Asset Value. The Funds' share prices or net asset values (NAV) are calculated as of the scheduled close of the regular trading session (usually 4 p.m. E.T. or such other time as of which the Funds' NAVs are calculated (the NAV Calculation Time)) on the New York Stock Exchange (the Exchange) on any day the Exchange is scheduled to be open. The NAV per share of a class is determined by dividing the value of the total assets of the Fund represented by such class, less all liabilities, by the total number of Fund shares of such class outstanding.

b) Security Valuation. Portfolio securities traded on any national stock exchange are valued based on the last sale price on the exchange where such shares are principally traded. For securities traded on NASDAQ, the Funds use the NASDAQ Official Closing Price. If there are no sales on a given day, the value of the security may be the average of the most recent bid and asked quotations on such exchange or the last sale price from a prior day. Where market quotations are not readily available, or, if in BAMCO, Inc.'s (the Adviser) judgment, they do not accurately reflect the fair value of a security, or an event occurs after the market close but before the Funds are priced that materially affects the value of a security, the security will be valued by the Adviser using policies and procedures approved by the Board of Trustees (the Board). The Board has designated the Adviser to perform fair value determinations pursuant to Rule 2a-5 under the 1940 Act. The Adviser has a Fair Valuation Committee (the Committee) comprised of senior management representatives and the Committee reports to the Board every quarter. Accordingly, the Committee may evaluate a variety of factors to determine the fair value of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Adviser's portfolio management team also will be considered. Using a fair value pricing methodology to price securities may result in a value that is different from the most recent closing price of a security and from the prices used by other investment companies to calculate their portfolios' NAVs.

U.S. Government obligations, money market instruments, and other debt instruments held by the Funds with a remaining maturity of 60 days or less are generally valued at amortized cost, which approximates fair value, unless an independent pricing service provides a valuation for such security or in the opinion of the Board or the Committee, the amortized cost method would not represent fair value. Debt instruments having a greater remaining maturity will be valued on the basis of prices obtained from a pricing service approved by the Board or at the mean of the bid and ask prices from the dealer maintaining an active market in that security. The value of the Funds' investments in convertible bonds/convertible preferred stocks is determined primarily by obtaining valuations from independent pricing services based on readily available bid quotations or, if quotations are not available, by methods which include various considerations such as yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Other inputs used by an independent pricing service to value convertible bonds/convertible preferred stocks generally include underlying stock data, conversion premiums, listed bond and preferred stock prices and other market information which may include benchmark curves, trade execution data, sensitivity analysis, when available, or an estimated value calculated based on the price of the underlying common share on the valuation date adjusted for accrued and unpaid dividends. Open-end investment companies, including securities lending collateral invested in registered investment company money market funds, are valued at their NAV each day.

NOTES TO PORTFOLIOS OF INVESTMENTS (UNAUDITED) (CONTINUED)

2. SIGNIFICANT ACCOUNTING POLICIES AND INVESTMENT RISKS (Continued)

Non-U.S. equity securities traded on foreign securities exchanges are generally valued using an independent pricing vendor that provides daily fair value adjustment factors based on information such as local closing price, relevant general and sector indexes, currency fluctuations, and depositary receipts, as applicable. Securities valued using such adjustment factors are classified as Level 2 in the fair value hierarchy. The models of the independent pricing vendor generate an adjustment factor for each security, which is applied to the local closing price to adjust it for post-closing market movements up to the time the Funds are valued and translated into U.S. dollars. If the vendor does not provide an adjustment factor for a security is valued based on its most recent local closing price and translated into U.S. dollars. The Adviser may also fair value securities in other situations, for example, when a particular foreign market is closed but the Funds are open. Other mutual funds may adjust the prices of their securities by different amounts.

c) Foreign Currency Translations. The accounting records of the Funds are maintained in U.S. dollars. Values of assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the price of such currencies at the NAV Calculation Time. Purchases and sales of investments and dividend income are converted at the prevailing rate of exchange on the respective dates of such transactions. Net realized gain (loss) on foreign currency transactions includes gain (loss) arising from the fluctuation in the exchange rates between trade and settlement dates on security transactions and currency gain (loss) between the accrual and payment dates on dividends and foreign withholding taxes. The Funds do not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in their market prices. Such fluctuations are included with the net realized and unrealized gain or loss from investments. The Funds may invest in foreign securities and foreign currency transactions that may involve risks not associated with domestic investments as a result of the level of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability, among others.

d) Securities Lending. The Funds may lend securities to certain brokers under the terms of a master netting agreement. Upon such loans, the Funds receive collateral which is maintained by the custodian. The Funds may pay fees to the custodian for administering the securities lending program. The Funds earn interest on such collateral and earn income in the form of negotiated lenders' fees. Securities loaned are required to be secured at all times by collateral equal to at least 102% of the market value of the securities loaned. Risks may arise upon entering into securities lending to the extent that the value of the collateral is less than the value of the securities loaned due to the changes in the value of collateral or the loaned securities. The collateral is marked-to-market daily and settled on the next business day. The Funds may receive collateral in the form of cash or other eligible securities, such as a letter of credit issued by a U.S. bank or securities issued or guaranteed by the U.S. government. Securities purchased with cash collateral are subject to the risks inherent in investing in these securities.

There were no securities on loan at December 31, 2023.

e) Repurchase Agreements. The Funds may invest in repurchase agreements, which are short term investments whereby the Funds acquire ownership of a debt security and the seller agrees to repurchase the security at a future date at a specified price. When entering into repurchase agreements, it is the Funds' policy that their custodian take possession of the underlying collateral securities, the market value of which, at all times, equals at least 102% of the principal amount of the repurchase transaction. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the seller defaults and the market value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Funds may be delayed or limited. The information required to be disclosed by FASB Accounting Standards Update No. 2011-11 for the Funds' investments in repurchase agreements at December 31, 2023, including the fair value of the repurchase agreement and the amount of collateral, can be found in each respective Fund's Portfolio of Investments.

f) Master Limited Partnerships. The Funds may invest in master limited partnerships (MLPs). MLPs are limited partnerships or limited liability companies, whose partnership units or limited liability interests are listed and traded on a U.S. securities exchange, and are treated as publicly traded partnerships for federal income tax purposes. To qualify to be treated as a partnership for tax purposes, an MLP must receive at least 90% of its income from qualifying sources as set forth in Section 7704(d) of the Internal Revenue Code of 1986, as amended. These qualifying sources include interest, dividend, real property rent, gain from sale or other disposition of real property and income from activities such as the exploration, development, mining, production, processing, refining, transportation, storage and marketing of mineral or natural resources.

g) Special Purpose Acquisition Company. The Funds may acquire an interest in a special purpose acquisition company (SPAC) in an initial public offering (IPO), via a private placement or a secondary market transaction. A SPAC is typically a publicly traded company that raises investment capital via an IPO for the purpose of acquiring the equity securities of one or more existing companies via merger, combination, acquisition or other similar transactions. To the extent the SPAC is invested in cash or similar securities, this may negatively affect a Fund's performance if the Fund is invested in the SPAC during such period. There is no guarantee that the SPACs will complete an acquisition or that any acquisitions that are completed will be profitable. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. These transactions will require the approval of the respective shareholders and are subject to other customary closing conditions, including the receipt of certain regulatory approvals. If these conditions are not met, the SPAC's acquisition may not close and, to the extent a Fund had committed to participate in a private placement (i.e., PIPE transaction, defined below), the Fund will no longer be obligated to fulfill its commitment.

NOTES TO PORTFOLIOS OF INVESTMENTS (UNAUDITED) (CONTINUED)

2. SIGNIFICANT ACCOUNTING POLICIES AND INVESTMENT RISKS (Continued)

h) Private Investment in Public Equity. The Funds may acquire equity securities of an issuer that are issued through a private investment in public equity (PIPE) transaction, including through commitments to purchase securities on a when-issued basis. A Fund will generally earmark an amount of cash or high quality securities equal to the amount of its commitment to purchase the when-issued securities. PIPE transactions typically involve the purchase of securities directly from a publicly traded company in a private placement transaction, including securities issued by a SPAC, typically at a discount to the market price of the company's securities. There is a risk that if the market price of the securities drops below a set threshold, the company may have to issue additional stock at a significantly reduced price, which may dilute the value of a Fund's investment. Shares in PIPEs generally are not registered with the SEC until after a certain time period from the date the private sale is completed. This restriction can last an uncertain amount of time and may be many months. Until the public registration process is completed, securities acquired via a PIPE are restricted as to resale and a Fund cannot freely trade the securities. Generally, such restrictions cause these securities to be illiquid during this time. PIPEs may contain provisions that the issuer will pay specified financial penalties to the holder if the issuer does not publicly register the restricted equity securities within a specified period of time, but there is no assurance that the restricted equity securities will be publicly registered, or that the registration will remain in effect.

Publicly traded securities acquired via a PIPE transaction are typically valued at a discount to the market price of an issuer's common stock and classified as Level 2 or Level 3 in the fair value hierarchy depending on the significance of the unobservable inputs. Discounts are applied due to certain trading restrictions imposed or a lack of marketability preceding the conversion to publicly traded securities. The primary inputs used in determining the discount are the length of the lock-up time period and volatility of the underlying security.

As of December 31, 2023, the Funds did not have any commitments to purchase when-issued securities through PIPE transactions with SPACs.

3. RESTRICTED SECURITIES

At December 31, 2023, investments in securities included securities that are restricted and/or illiquid. Restricted securities are often purchased in private placement transactions, are not registered under the Securities Act of 1933, may have contractual restrictions on resale and are valued pursuant to the policies and procedures for fair value pricing approved by the Board. An illiquid investment is any investment that the Funds reasonably expect cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, as determined pursuant to the provisions of SEC Rule 22e-4 (the Liquidity Rule) governing classification of portfolio securities. The Funds may receive more or less than this valuation in an actual sale and that difference could be material.

At December 31, 2023, the Funds held investments in restricted and/or illiquid securities that were valued pursuant to policies and procedures for fair value pricing as follows:

4. FAIR VALUE MEASUREMENTS

Fair value is defined by GAAP as the price that the Funds would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. GAAP provides a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable or unobservable. Observable inputs are based on market data obtained from sources independent of the Funds. Unobservable inputs are inputs that reflect the Funds' own assumptions based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical assets or liabilities;
- Level 2 prices determined using other inputs that are observable either directly or indirectly through corroboration with observable market data (which could include quoted prices for similar assets or liabilities, interest rates, credit risk, etc.);
- Level 3 prices determined using unobservable inputs when quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an asset or liability (unobservable inputs reflect each Fund's own assumptions in determining the fair value of assets or liabilities and would be based on the best information available).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk or liquidity associated with investing in those securities. For example, non-U.S. securities, with markets that close hours before the Funds value their holdings, may require revised valuations to more accurately reflect their fair value. Since these values obtained from quoted prices in an active market are adjusted, such securities are reflected as Level 2.

The Funds have procedures to determine the fair value of securities and other financial instruments for which market prices are not readily available or which may not be reliably priced. Under these procedures, the Funds primarily employ a market-based approach that may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine its fair value. The Funds may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed.

December 31, 2023

Baron Fifth Avenue Growth Fund

1 The volatility was calculated as a weighted-average of the volatilities of the individual comparable companies. Some companies have a higher weight in the calculation than others.

- ² Scenario A represents a Direct Listing/ IPO Event, Scenario B represents an Other Sale Event, and Scenario C represents a Liquidation Event.
- ³ Scenario A represents a worst case scenario. Scenario B represents a negative scenario that is better than the worst case. Scenario C represents a positive scenario.
- ⁴ The probabilities are associated with a range of potential IPO valuations.
- ⁵ Scenario A represents an IPO Event, while Scenario B represents a Liquidation/M&A Event.
- * Represents the directional change in the fair value of Level 3 investments that could have resulted from an increase in the corresponding input as of period end. A decrease to the unobservable input would have had the opposite effect. Significant changes in these inputs may have resulted in a significantly higher or lower fair value measurement at period end.

A significant change in the EV/EBITDA multiple ratio may result in a directionally similar significant change in the fair value measurement, while a significant change in the discount for lack of marketability and equity index of comparable companies may not result in a materially higher or lower fair value measurement.

5. COST OF INVESTMENTS FOR INCOME TAX PURPOSES

As of December 31, 2023, the Funds' cost of investments and gross unrealized appreciation (depreciation) for U.S. federal income tax purposes were as follows:

				Baron Fifth Baro					
	Baron Asset Fund	Baron Growth Fund	Baron Small Cap Fund	Baron Opportunity Fund	Avenue Growth Fund	Baron Discovery Fund	Durable Advantage Fund		
Cost of investments	\$1,333,604,986	\$1,201,838,158	\$2,184,051,789	\$530,679,407	\$294,381,794	\$1,112,006,675	\$149,534,841		
Gross tax unrealized appreciation Gross tax unrealized depreciation	3,483,253,675 (9,093,243)	6,723,746,475 (21,508,528)	2,510,055,258 (75,427,221)	617,325,670 (17,623,925)	255,776,339 (8,923,958)	379,091,021 (61,825,659)	33,429,307		
Net unrealized appreciation (depreciation)	\$3,474,160,432	\$6,702,237,947	\$2,434,628,037	\$599,701,745	\$246,852,381	\$ 317,265,362	\$ 33,429,307

¹ An "Affiliated" company ("affiliated person" as defined in the 1940 Act), is a company in which a Fund held 5% or more of the company's outstanding voting securities at any time during the three months ended December 31, 2023.

7. RECENT ACCOUNTING PRONOUNCEMENT AND REGULATION UPDATES

In June 2022, the FASB issued Accounting Standards Update No. 2022-03 (ASU 2022-03), "Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions" (Topic 820). ASU 2022-03 clarifies the guidance in Topic 820, related to the measurement of the fair value of an equity security subject to contractual sale restrictions, where it eliminates the need to apply a discount to fair value of these securities, and introduces disclosure requirements related to such equity securities. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2023, and allows for early adoption. The Funds have adopted ASU 2022-03 with an effective date of January 1, 2024.

In October 2022, the SEC adopted the Tailored Shareholder Reports for Mutual Funds and Exchange-Traded Funds rule and reform amendments requiring open-end management investment companies, including mutual funds and exchange-traded funds, to transmit concise and visually engaging semi-annual and annual tailored shareholder reports that highlight key information, including fund expenses, performance, and holdings to shareholders. Certain information from the Funds' current shareholder reports, including the Funds' portfolios of investments, financial statements, and financial highlights, will move to Form N-CSR. This information will be available online, mailed upon request and filed on a semi-annual basis. The rule and form amendments have a compliance date of July 24, 2024. Accordingly, the rule and form amendments will not impact the Funds until the 2024 annual shareholder reports.
